

# Shaked Golan - Full Stack Developer

Shaked518@gmail.com | 053-530-2345 | [in/shaked-golan](https://in/shaked-golan) | [shaked-porfolio.onrender.com](https://shaked-porfolio.onrender.com) | [github.com/ShakedGolan10](https://github.com/ShakedGolan10)

## SUMMARY

Passionate Full-Stack Developer with expertise in building responsive, high-performance web applications that emphasize scalability, performance and high- quality code using modern frameworks, libraries, and technologies like Node.js, REST-APIs, VueJS, React and more. I have a strong sense for spotting opportunities to integrate new technologies, enhance performance and improve efficiency.

## EXPERIENCE

### Full stack developer

Freelance

March 2023 - Present

- Develop and design end-to-end web applications such as CRM's, and websites.
- Implementing customer's app with APIs and apps such as Priority, Zapier, Pipedrive, Airtable and more.
- Handling the entire development cycle – architecture, design, development, debugging, testing, deployment, monitoring and optimizing.

### Full Stack Developer

Siasol (Ended employment due to budget limits, Continued as Freelancer.)

January 2024 - July 2024

- Incharge of improving the Green Phoenix dashboard used for CRUD operations on entities using react-leaflet library (image handling and display).
- Build and deliver new features in advanced O.O.P design pattern with NextJS (React & Node.Js).
- I've learned and mastered the company's codebase after 1 month.
- Developed in Agile, CI/CD, and Scaling environments; The platform using OAuth 2.0 flows to connect and authenticate.

## PROJECTS

### AirTnT, a marketplace In React

[airtnt-proj.onrender.com/](https://airtnt-proj.onrender.com/)

- Using Redux, socket.io, nodeJS, Express, MongoDB, REST, Mui, and Sass.
- Created for my final project at my bootcamp.

### Picgram: Instagram Clone in VueJS

[picgram-app.onrender.com/](https://picgram-app.onrender.com/)

- Using Vuex, socket.io, NodeJS, PostgreSQL, REST, Caching, Debounce, vue-query, lodash, Sequelize.
- Challenge - Data fetching strategy and limitation (of posts and stories).

### Shiftable - Shift management app in Next.js

[shiftable-app.onrender.com](https://shiftable-app.onrender.com)

- Using Typescript, Tailwind-css combined with NextUI, Firebase by Google, express, socket.io and O.O.P.
- Challenges - Firebase auth configuration & Create efficient data structure considering Firebase Pricing.

## EDUCATION

Udemy PostgreSQL bootcamp

GitHub CI/CD: Pipelines, CI/CD and Jenkins

Udemy 12h Bash scripting course

Coding Academy Full stack development Bootcamp (640h)

## SKILLS

- Web Development : React/Next.js/Vue/Angular development in Typescript & vanilla JavaScript, Vuex, Redux, React-query, Rxjs.
- ORM's : Prisma, Sequelize, Mongoose & Typegoose.
- Web Services & Server Development: REST APIs in Node.js using Express.js and Nest.js, and implementing Socket.io within microservices architectures.
- Frontend design: HTML, Scss, css, Tailwindcss, MUI, Bootstrap, NextUI.
- Cloud services such as AWS and GCP
- hands-on experience in managing cloud instances and deploying applications using Jenkins.
- Docker, Jenkins, Github CI/CD actions and pipelines.
- SQL and NoSQL databases such as: MongoDB, Firebase, GCP, PostgreSQL & MySQL.
- Hands on experience SDK's such as AWS, Firebase, and Github.
