## SUMMARY

Passionate Full-Stack Developer with expertise in building responsive, high-performance web applications that emphasize scalability, performance and high-quality code using modern frameworks, libraries, and technologies like Node.js, REST-API's, Vue.js, React and more. Part-time study (2-3 courses per semester) towards a B.Sc. in Computer Science, and actively searching for full-time roles and opportunities.

## EXPERIENCE

### Full stack developer

#### Freelance

March 2023 - Present

- Develop and design end-to-end web applications such as CRM's, and websites.
- Implementing customers' app with API's and apps such as Priority, Zapier, Pipedrive, Airtable and more.
- Handling the entire development cycle – architecture, design, development, debugging, testing, deployment, monitoring and optimizing..

### Full Stack Developer

#### Siasol-eyes

December 2023 - December 2024

- Responsible for enhancing dashboard features and implementing CRUD operations on a canvas with image manipulation using the React-Leaflet library.
- Build and deliver new features in advanced O.O.P design pattern with NextJS (React & Node Js).
- I've learned and mastered the company's codebase after 1 month.
- Developed in agile and scalable environments with CI/CD practices.
- Used OAuth 2.0 for secure connection and authentication..

## PROJECTS

### AirTnT, a marketplace In React (MERN).

[airtnt-proj.onrender.com/](https://airtnt-proj.onrender.com/)

- Using Redux, socket.io, nodeJS, Express, MongoDB, REST, Mui, and Sass.
- Completed within a week for my final project at my bootcamp.

### Reservation - a simple reservations app - React, MUI, Nest.js and MongoDB.

[reservation.onrender.com](https://reservation.onrender.com)

### Picgram - Instagram Clone in VueJS, Express and PostgreSQL

[picgram-app.onrender.com/](https://picgram-app.onrender.com/)

- Using Vuex, socket.io, Nodejs, PostgreSQL, REST, Caching, Debounce, vue-query, lodash, Sequelize.
- Challenge - Data fetching strategy and limitation (of posts and stories)..

### Shiftable - Shift management app in Next.js and Firebase by google.

[shiftable-app.onrender.com](https://shiftable-app.onrender.com)

- Using Typescript, Tailwind-css combined with NextUI, Firebase by Google, express, socket.io and O.O.P.
- Challenges - Firebase auth configuration & Create efficient data structure considering Firebase Pricing..

### Sense the voice - Python service for grammar correction and transcription using LLM models.

[github.com/ShakedGolan10/SenseTheVoice](https://github.com/ShakedGolan10/SenseTheVoice)

## EDUCATION

### Bachelor of Science in Computer Science (Part-Time, 1st Year)

Open University of Israel

## CERTIFICATIONS

### Coding Academy - Full stack development Bootcamp (640h)

### Udemy Bash scripting course

### Udemy PostgreSQL bootcamp

## SKILLS

SQL and NoSQL databases such as: MongoDB, Firebase, GCP, PostgreSQL & MySQL.

Web Services & Server Development: Expertise in building REST APIs using Node.js with Express.js and Nest.js, and integrating Socket.io within microservices/modules architectures.

Frontend design: HTML, Scss, Css, Tailwindcss, MUI, Bootstrap, NextUI.

Hands on experience SDK's such as AWS, Firebase, and Github.

Cloud services such as AWS and GCP - hands-on experience in managing cloud instances and deploying applications.

Familiarity with Docker, Github actions and CI/CD operations.

ORM's : Prisma, Sequelize, Mongoose & Typegoose.

Web Development : React/Next.js/Vue/Angular development in Typescript & vanilla JavaScript, Vuex, Redux, React-query, Rxjs.
