Shaked Golan – Full Stack Developer

✉ shaked518@gmail.com 📱 053-530-2345 in in/shaked-golan ☁ shaked-porfolio.onrender.com

SUMMARY

Passionate Full-Stack Developer with expertise in building responsive, high-performance web applications that emphasize scalability, performance and user experience using modern frameworks, libraries, and technologies like Node js, REST-API's, VueJs, React and more.
Part-time student (1-2 courses per semester) in Computer Science, able to work effectively full-time roles.

EXPERIENCE

Full Stack Developer
Freelancer - Creating web applications, and automations for business owners.   **March 2023 – Present**

Full Stack Developer
Siasol-eyes   **December 2023 – December 2024**
· My recommendation letter.
· Responsible for enhancing dashboard features and implementing CRUD operations on a canvas with image manipulation using the React-Leaflet library.
· Build and deliver new features in advanced O.O.P design pattern with NextJS (React & Node Js).
· Developed in Dockerized staging and production environments, adhering to the company's unique Git control and CI/CD's policies to ensure streamlined collaboration and deployment.
· Learned and mastered the company's codebase after 1 month.
· Used OAuth 2.0 for secure connection and authentication.

PROJECT

Reservation – a simple reservations app – React, MUI, Nest.js and MongoDB.
reservation.onrender.com

Picgram– Instagram Clone in VueJS, Express and PostgreSQL
picgram-app.onrender.com/
· Using Vuex, socket.io, Nodejs, PostgreSQL, REST, Caching, Debounce, vue-query, lodash, Sequelize.
· Challenge – Data fetching strategy and limitation (of posts and stories)..

AirTnT, a marketplace In React (MERN).
airtnt-proj.onrender.com/
· Using Redux, socket.io, nodeJS, Express, MongoDB, REST, Mui, and Sass.
· Completed within a week for my final project at my bootcamp.

Shiftable – Shift management app in Next.js and Firebase by google.
shiftable-app.onrender.com
· Using Typescript, Tailwind-css combined with NextUI, Firebase by Google, express, socket.io and O.O.P.
· Challenges – Firebase auth configuration & Create efficient data structure considering Firebase Pricing..

Sense the voice – Python service for grammar correction and transcription using LLM models.
github.com/ShakedGolan10/SenseTheVoice

EDUCATION

Bachelor of Science in Computer Science (Part-Time, 1st Year)
Open University of Israel

CERTIFICATIONS

Udemy PostgreSQL bootcamp

Udemy Bash scripting course

Udemy - Docker & Kubernetes: The Practical Guide [2025 Edition]

Coding Academy - Full stack development Bootcamp (640h)

SKILLS

Hands on experience SDK's such as AWS, Firebase, and Github.

Web Development : React/Next.js/Vue/Angular development in Typescript & vanilla JavaScript, Vuex, Redux, React-query, Rxjs.

Cloud services such as AWS and GCP - hands-on experience in managing cloud instances and deploying applications.

Familiarity with Docker, Github actions and CI/CD operations.

Server Development: Expertise in building REST APIs using Node.js with Express.js / Nest.js, also Socket.io within microservices/modules architectures.

Frontend design: HTML, Scss, Css, Tailwindcss, MUI, Bootstrap, NextUI.

Databases: MongoDB, Firebase, GCP, PostgreSQL & MySQL, including ORM's such as Prisma, Sequelize, Mongoose & Typegoose.

Python - experience in working with servers build in FastAPI or Django.
